

# Social Interventions

Precontemplation: Not intending to change in the next 6 months. Focus specific to the individual should be on becoming better informed about factors that affect a healthy lifestyle through the use of social interventions.

| Name of Intervention | Description of Intervention                                                                                                                                                                         |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Social Media         | Advise the client to subscribe to a free social media page to receive healthy living information.                                                                                                   |
| Local Conferences    | Advise the client to research local events focusing on wellness and healthy living.                                                                                                                 |
| Groups 1             | Advise the client to research three recreational sports team activities that he or she finds somewhat interesting (e.g., soccer team, hiking club, volleyball league, bowling, kickball, softball). |
| Family Involvement 1 | Have the client work with his or her family to identify three popular magazines that are health and fitness related.                                                                                |
| Accountability 1     | List people in the client's life who consistently hold that individual accountable.                                                                                                                 |
| Support System       | Evaluate the client's different support systems. Consider which ones provide the client with the most support.                                                                                      |
| Education            | Increase awareness of the importance of social support by detailing five benefits of a social exercise group.                                                                                       |

Contemplation: Intending to change within the next six months. Focus specific to the individual should be on using social interventions that provide opportunities for clients to identify benefits of healthy change specific to them or identifying social opportunities that can be implemented in the action stage.

| Name of Intervention     | Description of Intervention                                                                                                                                                           |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Family Involvement 1     | Discuss with family members the benefits of adopting a healthy lifestyle.                                                                                                             |
| Find a Friend            | List three friends who you think might be willing to accompany you on your wellness journey.                                                                                          |
| Family Involvement 2     | With the help of your family, list five benefits of eating healthy and exercising more.                                                                                               |
| Social Anxiety           | Find an online forum or social media page for a group exercise class. Discuss the benefits of group exercise and moving past social anxiety barriers with other users on the website. |
| Build a Support System 1 | Discuss with a friend or family member activities that you both enjoy participating in. Discuss ways in which you might be able to participate in these activities together.          |
| Local Fairs              | Attend a local wellness fair, festival, or event. Find three groups among the booths that you would like to research and find more information about.                                 |
| Fun Runs                 | Have the client research different marathons, fun runs, and obstacle courses in the local area.                                                                                       |

# Social Interventions

Preparation: Intending to change in the next month. Interpersonal interventions should be focused on helping clients prepare for a healthy lifestyle.

| Name of Intervention     | Description of Intervention                                                                                                                                                                         |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Accountability 2         | Share your goals with three different people in your life (e.g., coworkers, family members, friends) who you think will hold you accountable. Let them know the expected start date for your goals. |
| Workout Partner 1        | Plan to schedule an appointment for your chosen workout partner and you to meet with your fitness or wellness professional.                                                                         |
| Races/Events 1           | Plan to volunteer as support staff (e.g., bag check, race check-in, water stations) with a friend for a fun run (e.g., 5K, 10K, charity race, adventure race) you are interested in.                |
| Family Involvement 3     | With your family, research three gyms, fitness professionals, and/or nutritionists who interest you. Review their websites and decide on one you would like to tour or meet with as a family.       |
| Workout Partner 2        | Set up a regular schedule for workouts with your workout partner to meet at the gym three times a week for 2 months. Plan to set a specific date for this program to begin.                         |
| Build a Support System 2 | Discuss and plan to schedule a time for you and your friend/family member to begin the activity you both would enjoy together (e.g., biking, rock climbing, tennis, golf, yoga, exercise class).    |
| Nutrition Class          | Plan to schedule a time to attend a nutrition class with a partner.                                                                                                                                 |
| Attend a Class 1         | Plan to schedule a date to begin attending an exercise class.                                                                                                                                       |
| Step Challenge 1         | Find one person who would be willing to purchase a fitness tracker and join a step challenge with you.                                                                                              |

# Social Interventions

Action: Just beginning to change. Interpersonal interventions should focus on helping the client incorporate healthy behavior change

| Name of Intervention | Description of Intervention                                                                                                                                                                                       |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Family Involvement 4 | As a family, discuss ways that you can support one another when various barriers arise so you can all stay on track with your healthy lifestyle.                                                                  |
| Accountability 3     | Check in with two people on a weekly basis to discuss your progress toward your goals.                                                                                                                            |
| Attend a Class 2     | Attend a class that you are interested in and introduce yourself to the instructor and one other participant.                                                                                                     |
| Workout Partner 3    | Develop a plan of action with a workout partner to motivate each other on days when one or both partners are not motivated to go into the gym. (Refer to Chapter 5 for a description of contingency contracting.) |
| Backup Plan          | Develop an alternative solution for times when you are unable to attend the class for the day. Discuss the solution with someone.                                                                                 |
| Races/Events 2       | Find a partner to participate in a fun run with. Sign up for the fun run.                                                                                                                                         |
| Step Challenge 2     | Begin a step challenge with friends, family, or coworkers.                                                                                                                                                        |

Maintenance: In the process of change for 6 months. Interventions specific to interpersonal/social factors should focus on participating in social groups that help maintain change.

| Name of Intervention   | Description of Intervention                                                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Family Involvement 5   | Discuss with your family ways in which they can assist you in managing various triggers that normally set you back.                                 |
| Develop Accountability | Start your own workout, run, or exercise group with neighbors, friends, or family.                                                                  |
| Healthy Habits         | Plan a healthy work lunch with your coworkers once per week.                                                                                        |
| Classes/Group Events   | Join a group that you have thought about going to but have avoided (e.g., rock climbing group, yoga class, master's swim team).                     |
| Nutrition              | Attend a healthy cooking class (e.g., juicing class, vegetarian cooking, raw foods class, healthy food preparation) with a friend or family member. |
| Races/Events 3         | Gather and lead a team to participate in a long-distance relay race, relay triathlon, or similar event.                                             |
| Blogging               | Start a regular blog discussing your nutrition tips, workout tips and encouragement, and healthy journey.                                           |
