

Six Step Process

Today's Date: _____ Target Date: _____ Start Date: _____

Date Achieved: _____ Goal: _____

1. Set a goal.
- Pick one: Weight Loss, Muscle Gain, Weight Loss + Muscle Gain, or Sport Performance

2. Set calorie (energy) needs.

3. Set protein target (typically 1.2 to 2.2 g/kg/day).

4. Set fat target (typically 20 to 35% of total calories).

5. Set carbohydrate target (daily calories – protein – fat = carbohydrate calories).

6. Convert numbers to food and habits.
