

Product Nutrition Claims

Nutrient Term	Definition
Low Calorie	Contains 40 calories or less per serving
Calorie Free	Contains less than 5 calories per serving
Low Cholesterol	Contains 20 milligrams or less per serving and 2 grams or less of saturated fat per serving
Cholesterol Free	Contains less than 2 milligrams of cholesterol per serving
Low Fat	Contains less than 3 grams of fat per serving
Reduced Fat	Contains at least 25% less fat per serving than the regular product (for a similar serving size)
Low Saturated Fat	Contains 1 gram or less of saturated fat per serving and no more than 15% of calories from saturated fat
Saturated Fat Free	Contains less than 0.5 grams of saturated fat per serving and no greater than 0.5 grams of trans fat per serving
Fat Free	Contains less than one-half of a gram of total fat per serving
% Fat Free	Contains X% non-fat macronutrients by weight (e.g., 98% fat free)
No Trans Fat	Contains less than 0.5 grams of trans fat per serving. Not that this does not mean completely free of trans fats.
No Sugar	Contains less than one-half of a gram of sugar per serving
No Added Sugar	Contains no added sources of sugar (but might still contain a large amount of natural sugar, e.g., dried fruit)
Low Sodium	Contains less than 140 milligrams of sodium per serving
Very Low Sodium	Contains less than 35 milligrams of sodium per serving
No Salt Added	Contains no added salt (might still contain sodium if naturally occurring in the food) and must state that it is not sodium free
Sodium Free	Contains less than 5 milligrams of sodium per serving
Light/Lite	Contains 50% less fat or sodium or one-third fewer calories than the regular product (for an equal serving size)
Gluten Free	Contains less than 20 parts per million (ppm) of gluten*
Certified Gluten Free	Certified by an independent organization to contain less than 10 ppm of gluten per serving

*The FDA allows products to be labeled gluten free if they are inherently free of gluten, meaning they do not contain wheat, rye, barley, or any hybrids of these grains. Gluten-free products might still contain less than 20 ppm of gluten (Academy of Nutrition and Dietetics, 2017; Celiac Disease Foundation, n.d.).
