THE PURPOSE OF THE INTAKE PROCESS

Establishing Trust & Credibility

The intake process builds a relationship and allows the coach to create trust and buy in.

Understanding the Human Behind the Data

Coaching is about changing human behavior, which requires coaches to see the human beyond the intake data.

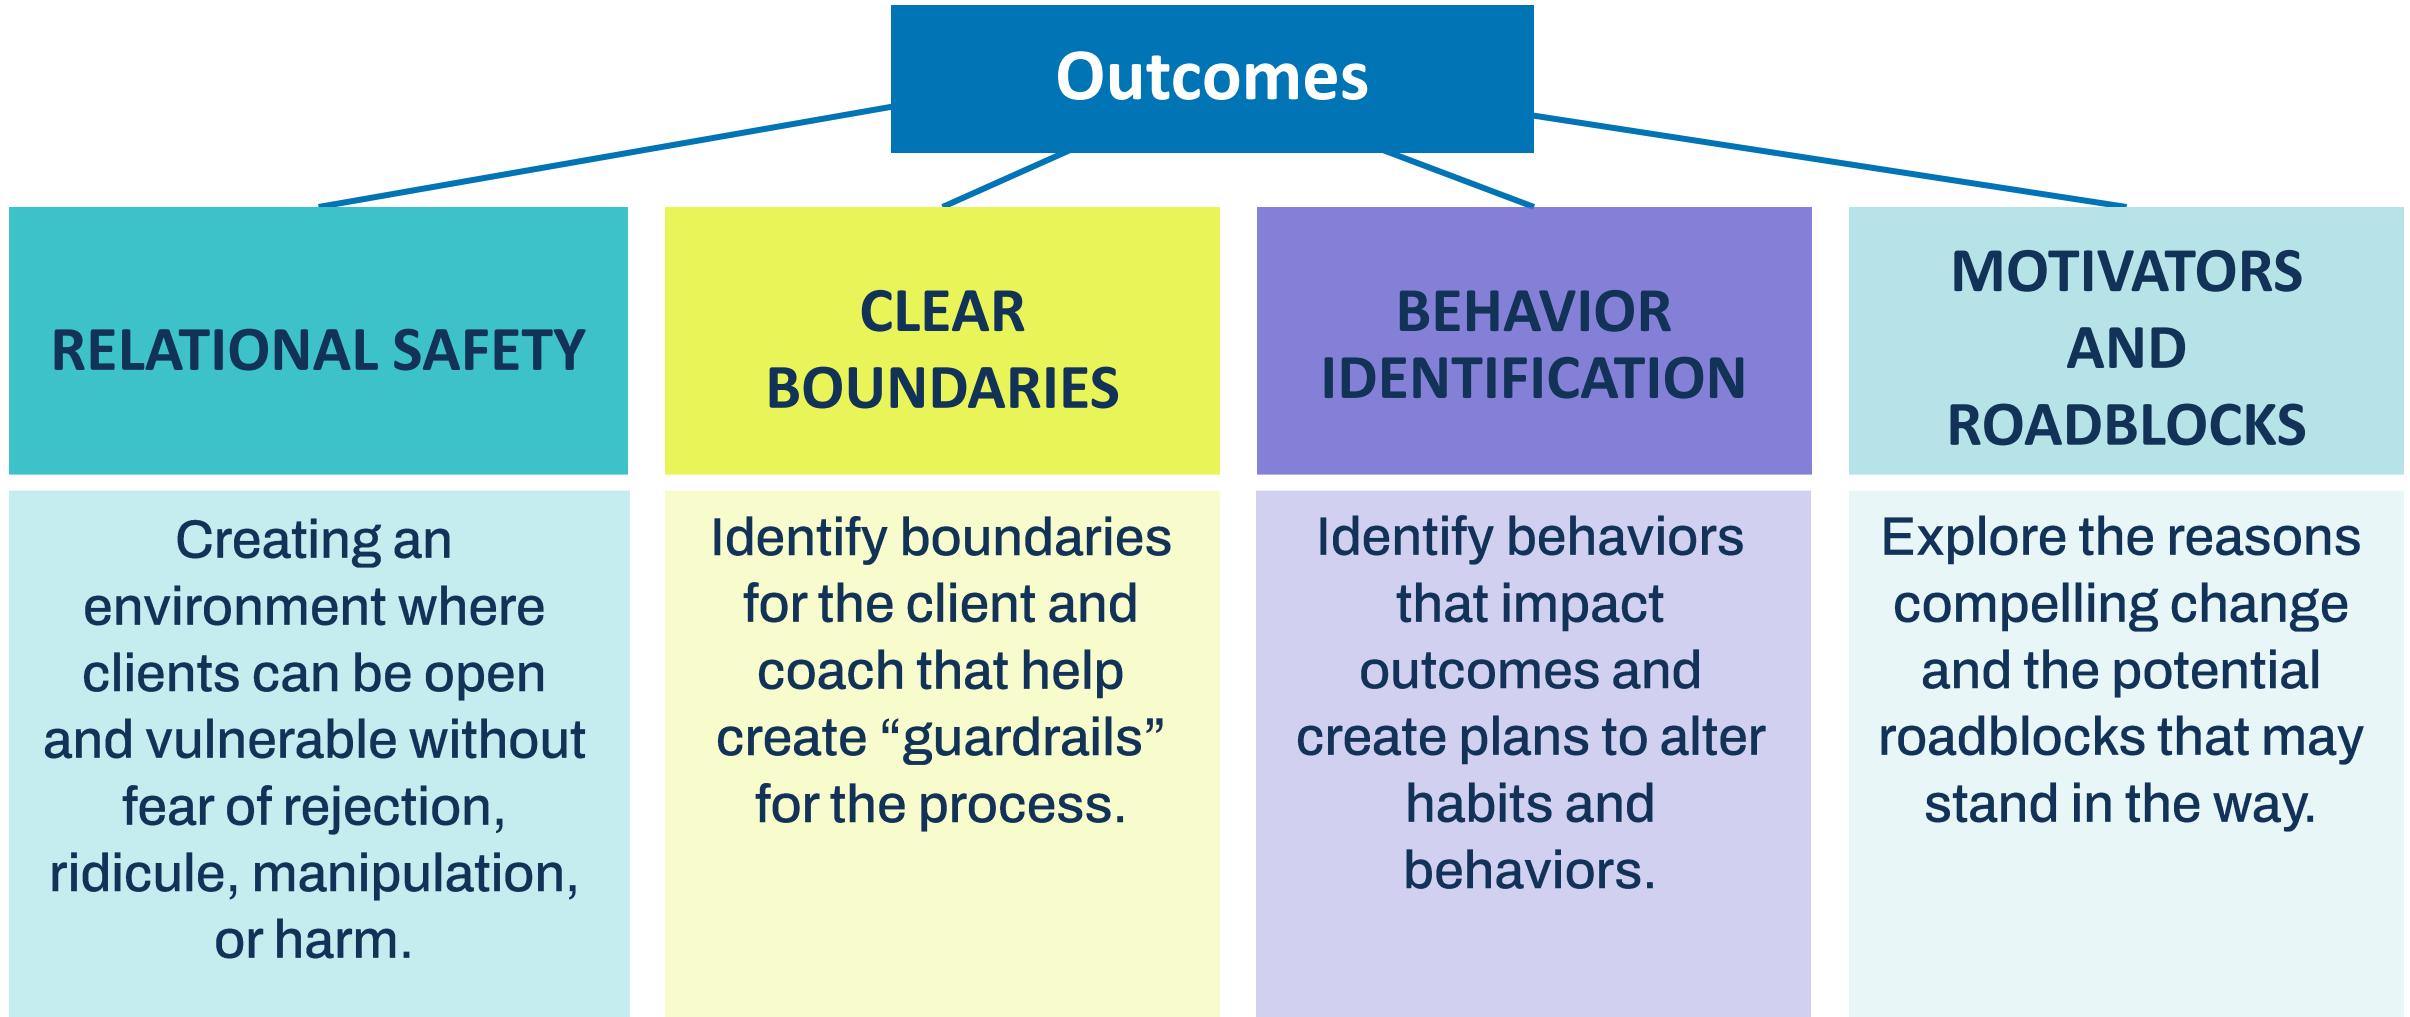

Aligning Expectations & Goals

The intake process allows the coach and the client to become aligned on expectations and goals.

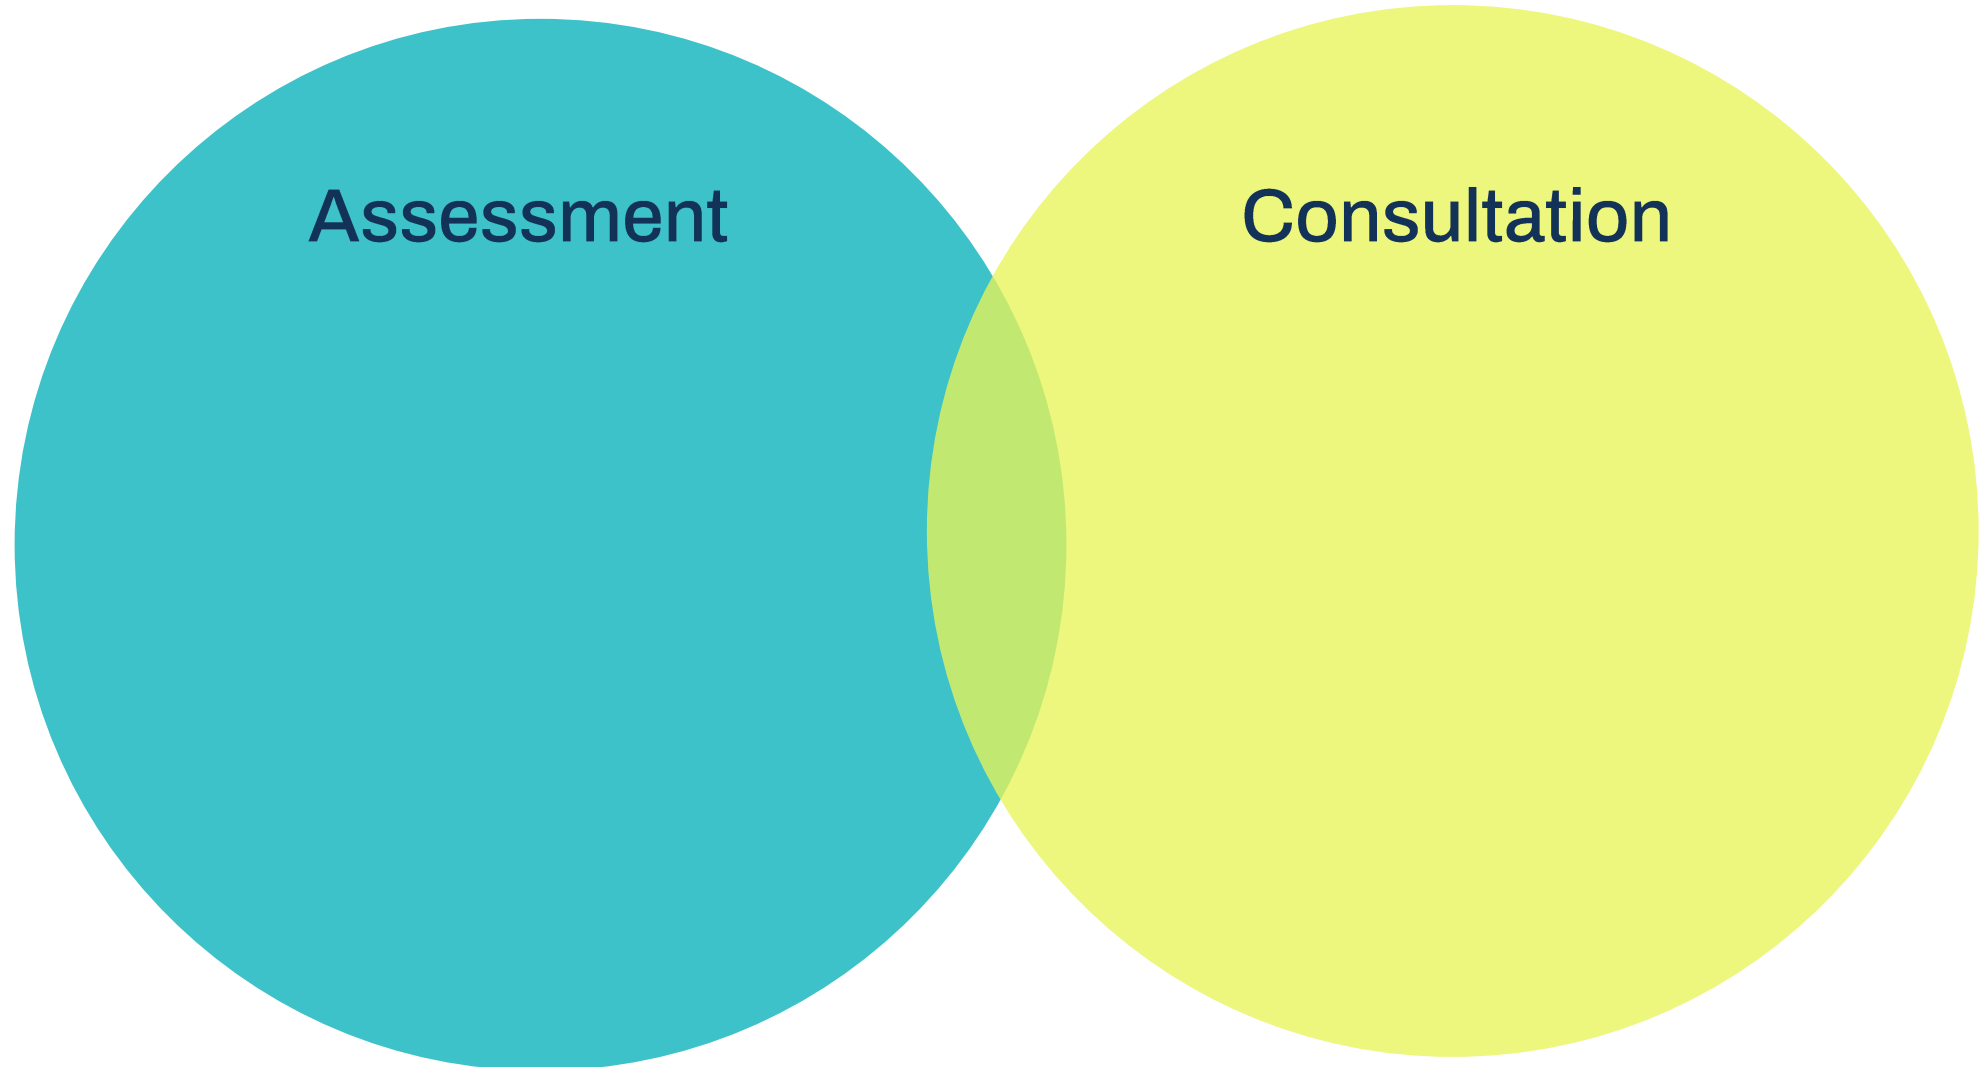

Creating a Shared Vision

Longer term success depends on the coach and the client having a common/shared vision for the outcome.

THE PURPOSE OF THE INTAKE PROCESS

ASSESSMENT VS CONSULTATION

ASSESSMENT VS CONSULTATION

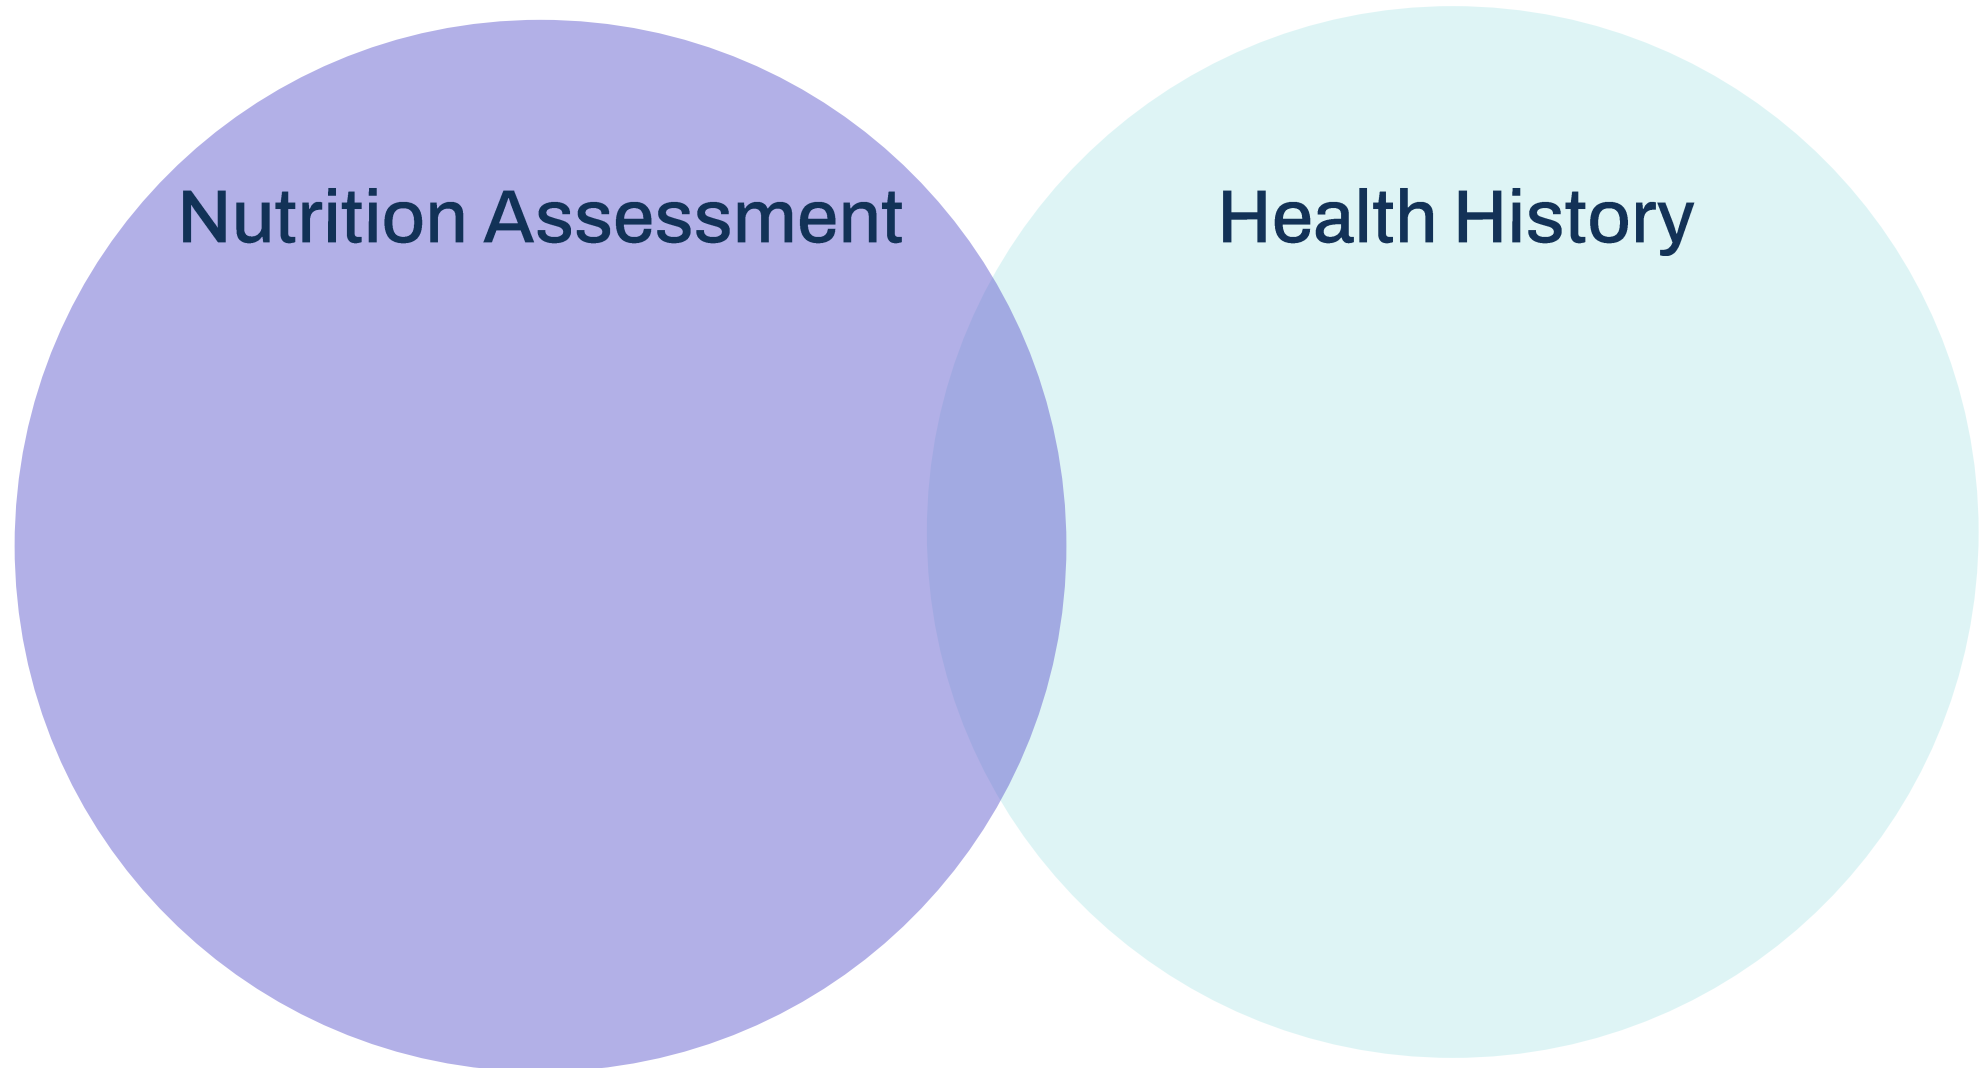

ASSESSMENT

- Information gathering
- Objective measures
- Forms, surveys, tests, logs, etc.
- Baseline information is the outcome

CONSULTATION

- Relationship building and collaborative interpretation
- Subjective discussion
- Conversation and feedback
- Shared understanding and strategy is the outcome

NUTRITION ASSESSMENT VS HEALTH HISTORY

NUTRITION ASSESSMENT VS HEALTH HISTORY

NUTRITION ASSESSMENT

- Evaluate a client's current nutrition status
- Food intake, eating behaviors, diet patterns.
- Snapshot of how someone is eating

CONSULTATION

- Understand a client's overall medical and health background
- Conditions, risks, lifestyle factors, scope of practice
- Establishes the playing field, defines scope of practice and referrals
