AMAT Definition of Terms – Page 2

1	Outcome-Focused	Outcome-focused athletes focus on results a lot, such as scores, times, or wins. Process-focused athletes focus more on the moment and their performance.	Process-Focused
2	Nervous/Anxious	Nervous athletes worry about their performance and feel uneasy or apprehensive a lot. Relaxed athletes feel calm but challenged when performing.	Relaxed/Calm
3	Distracted	Distracted athletes pay attention to the wrong things when they perform. Focused refers to athletes who think about the right cues to perform their sport.	Focused
4	Self-Doubt	Athletes with self-doubt tend to question their ability to perform well. Confident athletes don't have a lot of self-doubt or question their ability.	Confident
5	Frustrated	Frustrated athletes become upset or angry when they make mistakes or poor plays. Composed athletes move on quickly after mistakes.	Composed
6	Fearful	Fearful athletes worry about messing up and losing. Fearless athletes focus on performing well and playing assertively or aggressively.	Fearless
7	Self-conscious	Self-conscious athletes worry about what others think about their performance. Self-assured athletes don't care about how others view their performance.	Self-assured
8	Perfectionist	Perfectionist athletes want to perform perfectly and can become easily frustrated. Functional athletes want to perform efficiently.	Functional/Efficient
9	Unclear Goals	Athletes with unclear goals are unsure about good goal setting. Athletes with smart goals, set specific, measurable goals for the short-term and long-term.	Clear/Smart Goals
10	Strive for Expectations	Athletes who strive for expectations feel a lot of demands and pressure from themselves and others to perform well and win.	Strive for Goals
11	Pregame Anxiety	Athletes with pregame anxiety feel stressed, uneasy, and anxious before they perform. Pregame excitement refers to feeling "pumped up" or ready before games.	Pregame Excitement
12	Over thinking	Athletes who over think focus too much on the details or how to of their performance. Calm mind refers to performing simple and reacting.	Clear Mind
13	Over Controlled	Over controlled is athletes who lack trust or perform tight. High trust in skills refers to letting your skills happen, relying on muscle memory.	High Trust in Skills
14	Negative Self-Talk	Athletes with negative self-talk berate themselves after mistakes, such as "I stink" or "That was awful." Positive self-talk is being your own friend.	Positive Self-Talk
15	No Pregame Routine	Athletes who lack a pregame routine don't know how to mentally prepare or don't have a set routine to get ready for a game or performance.	Pregame Routine
