Cone drills are performed in various patterns by running from cone to cone to enhance speed and agility.

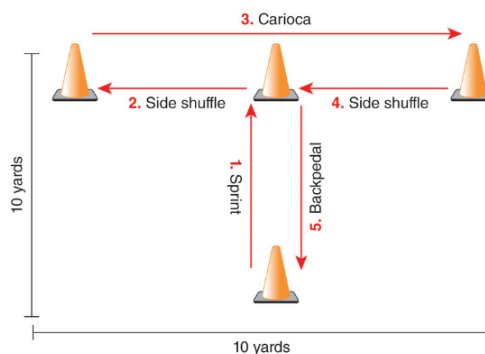

Box Drill

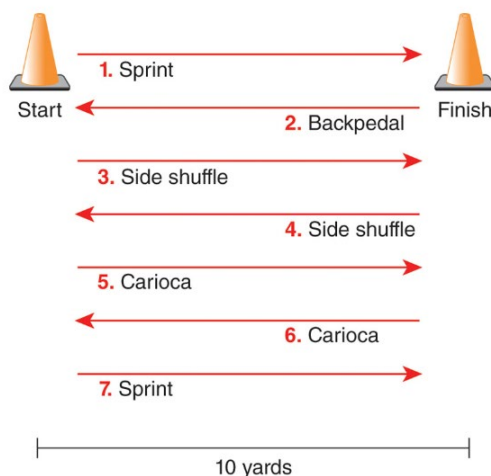

5-10-5 Drill

T-Drill

L.E.F.T Drill

These SAQ drills, when incorporated into an MMA athlete's training routine, can help optimize their explosive power, quickness, and agility, giving them a competitive edge in the ring or octagon. It is essential to perform these exercises with proper form and gradually increase intensity to reduce the risk of injury while maximizing training benefits.
