

OHSa Solutions Chart

Joint	Viewpoint	Movement Impairment	Possible Muscle Imbalances
Foot and ankle	Anterior	Turn out	Overactive - Gastrocnemius/soleus (calves) - Hamstrings complex Underactive - Anterior and posterior tibialis (shin muscles) - Gluteus maximus and medius
Knee	Anterior	Valgus	Overactive - Tensor fascia latae (TFL) (muscle near front of hip) - Adductor complex (inner thigh muscles) Underactive - Gluteus maximus and medius - Anterior and posterior tibialis
LPHC	Lateral	Low-back arches	Overactive - Hip flexors (rectus femoris, psoas, TFL) - Lumbar extensors (low-back muscles) - Latissimus dorsi (large back muscle) Underactive - Gluteus maximus - Hamstrings complex - Abdominals
	Lateral	Excessive forward trunk lean	Overactive - Hip flexors - Gastrocnemius/soleus - Rectus abdominis and external obliques (superficial abdominal muscles) Underactive - Gluteus maximus - Hamstrings complex - Lumbar extensors
	Lateral	Arms fall forward	Overactive - Latissimus dorsi - Pectoralis major and minor (chest muscles) - Teres major (posterior shoulder muscle) Underactive - Middle and lower trapezius (mid-back muscle) - Rhomboids (muscles near shoulder blades) - Posterior deltoids (back of shoulder muscles) - Portions of the rotator cuff (small muscles that stabilize the shoulder)
