

CLIENT'S NAME: Maria					
GOAL: Improve hip mobility; prevent ACL injury					
PHASE:					
DATE:					
EXERCISE	SETS	REPS	TEMPO	REST	NOTES
FLEXIBILITY – Inhibit with self-myofascial rolling or other technique and lengthen with stretching techniques					
Gastrocnemius	1	30 sec			.
Adductors	1	30 sec			
IT Band/TFL	1	30 sec			
ACTIVATION – Isolated strengthening, trunk postural control (core), balance (hip/knee/ankle integration)					
Anterior Tibialis	1–2	30 sec	slow		
Gluteus Medius	1–2	30 sec	slow		
Gluteus Maximus	1–2	30 sec	slow		
INTEGRATION & SKILL DEVELOPMENT – Integrated dynamic movement, SAQ, plyometrics, goal-specific prep					
Lateral Tube Walk	1–2	30 sec	slow	30 sec	
Single-Leg Squat	1–2	30 sec	slow	30 sec	
Ice Skater Hop	1–2	30 sec	control	30 sec	
RESISTANCE TRAINING – Specific to phase and goal					
CLIENT'S CHOICE – Single joint, additional core training, accessory movements, metabolic conditioning					
COOL-DOWN – Myofascial technique and static stretch
