

Common Sport-Specific Injuries

Sport	Common Injuries
Baseball and softball	Ankle and knee ligament injuries (e.g., ACL), lower-extremity muscle strains (e.g., hamstrings), concussions, contusions, shoulder/elbow ligament sprains or muscle strains, wrist/hand bone fractures
Basketball	Ankle and knee ligament injuries (e.g., ACL), lower-extremity muscle strains (e.g., hamstrings), contusions, concussions, and upper-extremity ligament sprains or muscle strains
Soccer	Ankle and knee ligament injuries (e.g., ACL), lower-extremity muscle strains (e.g., hamstrings), contusions, concussions
Ice hockey and field hockey	Ankle and knee ligament injuries (e.g., ACL), lower-extremity muscle strains (e.g., groin injury), shoulder/elbow ligament sprains or muscle strains, wrist/hand injuries (e.g., bone fracture, muscle strains, ligament sprains, dislocations), concussions, spine injuries
Wrestling	Ankle and knee ligament injuries (e.g., ACL), upper- and lower-extremity muscle strains (e.g., rotator cuff, hamstrings), contusions, concussions, upper-extremity traumatic injuries (e.g., shoulder dislocation, AC joint separation, wrist fracture), spine injuries
Tennis	Ankle and knee ligament injuries (e.g., ACL), upper- and lower-extremity muscle strains (e.g., rotator cuff, hamstrings, calves)
Lacrosse	Ankle and knee ligament injuries (e.g., ACL), upper- and lower-extremity muscle strains (e.g., rotator cuff, hamstrings), concussions, contusions, upper-extremity traumatic injuries (e.g., shoulder dislocation, AC joint separation, wrist fracture)
Gymnastics	Ankle and knee ligament injuries (e.g., ACL), upper- and lower-extremity muscle strains (e.g., rotator cuff, hamstrings), concussions, contusions, upper-extremity traumatic injuries (e.g., shoulder dislocation, AC joint separation, wrist fracture), spine injuries
Volleyball	Ankle and knee ligament injury (e.g., ACL), upper- and lower-extremity muscle strains (e.g., rotator cuff, hamstrings), concussions, contusions.
Diving and swimming	Spine injuries, upper-extremity injuries (e.g., glenohumeral instability, overuse muscle strains, ligament sprain), postural dysfunctions
Skiing and snowboarding	Ankle and knee ligament injuries (e.g., ACL), lower-extremity muscle strains (e.g., hamstrings), contusions, concussions, upper-extremity traumatic injuries (e.g., shoulder dislocation, AC joint separation, wrist fracture), spine injuries
Cheerleading and dance	Ankle and knee ligament injuries (e.g., ACL), lower-extremity muscle strains (e.g., hamstrings), contusions, concussions, upper-extremity traumatic injuries (e.g., shoulder dislocation, AC joint separation, wrist fracture), spine injuries
Cross country and running	Lower-extremity overuse injuries (e.g., stress fractures, medial tibial stress syndrome, tendinopathy), lower extremity muscle strains (e.g., hamstrings), plantar fasciitis
<i>Abbreviations: AC, acromioclavicular; ACL, anterior cruciate ligament.</i>
