

Mobility Screening Observational Findings Recording Template

Checkpoint	Screening Test	Overactive Shortened	Results
Foot and ankle	Ankle dorsiflexion	Gastrocnemius/Soleus	● Yes ● No
	First MTP extension	Flexor hallucis longus	● Yes ● No
		Knee dominance	● Yes ● No
LPHC	Lumbar flexion and extension	Rectus abdominis, internal obliques, and external obliques	● Yes ● No
	Hip extension, adduction, and knee flexion	Restricted hip extension: psoas, rectus femoris	● Yes ● No
		Restricted adduction: tensor fascia lata	● Yes ● No
		Restricted knee flexion: rectus femoris	● Yes ● No
	Hip abduction and external rotation	Hip adductors	● Yes ● No
	Passive hip internal rotation	Piriformis, quadratus femoris, and gluteus maximus	● Yes ● No
	Seated hip internal and external rotation	Restricted internal rotation: Piriformis, gemellus superior/inferior, obturator internus/externus, quadratus femoris, gluteus maximus	● Yes ● No
		Restricted external rotation: Tensor fascia lata, gluteus minimus/medius (anterior fibers), and hip adductors	● Yes ● No
Shoulder	Shoulder flexion	Latissimus dorsi, teres major, and pectoralis major (lower fibers)	● Yes ● No
	Shoulder retraction	Pectoralis minor	● Yes ● No
	Shoulder extension	Anterior deltoid, pectoralis major (upper fibers), coracobrachialis, biceps brachii	● Yes ● No
	Shoulder internal rotation	Teres minor and Infraspinatus	● Yes ● No
	Shoulder external rotation	Subscapularis, teres major, latissimus dorsi, and pectoralis major	● Yes ● No
Thoracic	Extension	Rectus abdominis, internal obliques, and external obliques.	● Yes ● No
	Rotation	Rectus abdominis, internal obliques, external obliques, and erector spinae	● Yes ● No
