

Phases of the Jerk

Kinetic Chain Checkpoint	Phase					
	Set-up	Dip	Drive	Push-under	Catch	Stand
Feet	Straight, about hip-width apart, weight distribution in the center of the foot	Actively press feet flat into the ground	Actively press to create plantarflexion	From the ball of the foot to the floor – a split second off the ground to reposition for the catch	Push Jerk: Flat on floor wider than starting position Split Jerk: front foot flat, shin vertical, back foot on the ball	Push Jerk: Stand Split Jerk: front foot small step backward; back foot steps forward
Knees	Soft, tracking with toes	Short, quick bend, tracking over toes	Straighten/extend the knees	Flexing	Both bent	Extend
LPHC	Low back in a neutral position (lordotic curve)	Remain neutral and braced	Hip extending	Flexing at hip	Front hip flexed, back hip extended, low back neutral	Hips extend, low back neutral
Shoulders	Tall	Remain in the setup position	Elevating/shrugging	Rapidly moving from flexion to full overhead flexion	Fully flexed	Remain in the setup position
Head	Neutral with the neck in slight flexion (this helps maintain thoracic extension), eyes should be looking out in front rather than down	Remains in the setup position	Remains in the setup position	Remains in the setup position	Remains in the setup position	Fully Flexed
